

Ready to refocus on pressure injury prevention and improve outcomes?

You're not alone. Surveyed caregivers revealed education is key.

42% increase in pressure injury rates during the pandemic¹

Less PI education and training received by:

72% of home health nurses²

40% of hospital staff²

38% of nursing home caregivers²

Decrease in focus on Skin Champions:

55% of hospital-based teams stopped meeting regularly²

Pause in preventive care:

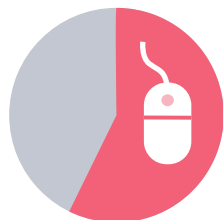

1 out of 3 nurses say PI prevention is not top of mind during daily patient care²

Where to start: Re-energize PI education and training

How do nurses prefer to learn?

59% through online courses²

Medline offers:

200+ hours of expert-led webinars and online courses

+ **24** pre-built skin and wound care training modules

Make **skin health** second nature™
